Plantation Drive

Report

-29TH August 2023-

word...

Planting trees goes beyond the simple act of placing seeds in the ground; it is an investment in the well-being of our future generations and the planet we share. Planting trees helps to purify the polluted air that we breathe in. Plants play a big role in our ecosystem by maintaining a balance among all the elements that are present in nature.

With this motto and under the aegis of Mission LiFE (Lifestyle for Environment), introduced by the Hon'ble Prime Minister to rekindle a global pursuit to adopt sustainable lifestyle and practices, the University of Delhi organised a campaign in the form of a mass tree plantation drive. This endeavour is not only an extension of the mission LiFE, but also an opportunity for us to collaboratively contribute to the betterment of our environment, both aesthetically and ecologically.

Under the campaign, it was intended to plant about one thousand trees simultaneously at multiple sites within the University of Delhi and its colleges/departments/hostels. As a follow-up of the same, HIRAV, THE GREEN CAMPUS SOCIETY of Ram Lal Anand College organized the plantation drive, in which large number of students participated, along with Vice Principal sir, Convener of the society, Teachers members of the society took part as well.

A list of following plants that are well suited to the local ecosystem have been planted during the drive;

- Two Jacaranda Plants**
- Two Arica Plants**
- Four Champa Plants**

We witnessed huge participation from the students of different departments as well.

- Total Number of participants- 36**
 - Number of Male students-18**
 - Number of female students -18**

We thank all the participants for joining hands with us as we embark on this journey of transformation, growth, and sustainability with a collective vision of leaving a lasting impact on the University and the environment at large.
